To my understanding, the icon itself (that is, if you take out the bright background with a plain color) is the icon, the faded-out version that is transparent (not a white background) has only the original icon. And the icon background is also set by your Personalisation settings. For example, in 7/10/2011, it was (as per my settings at that time): From the first screenshot we can clearly see the text: "Setting", the date: July 10, 2011, the button on the right is called Settings, and the icon-transparent area is the icon itself. In the second screenshot, we can see that the color-correct icon is still the same, but the transparent area is a pale-grey tone that makes it appear even more transparent. @ADHERENT_ST8 - lol, now you know how to do it yourself. Also, notice, that as per this screenshot, the colours for the transparent area of the icon are the same as the main 'background'. If you create a similar icon, you won't be able to see the "Setting", "July 10, 2011", or "Settings". You will only see the icon itself. You've taken my words out of context! I was referring to the icon's background color only. My example was to

"In its final analysis, the bike-photographer approach is a gimmick that requires you to spend most of your time in settings where bikes aren't and that's a baffling proposition when you can get it done in the time it takes to shoot a front-facing pix. Dopey?" Christina Chong The Verge 8 Mar, 2018 "The result is a complete mess of confusing and ultimately unsatisfying interactions that feels rushed and fleeting." Mark Coker US Photography 29 Oct, 2017 "Now it's a mystery what actually becomes popular in any given area, and on any given week, but there will always be a gang of guys who make a trek to a bike meet, find someone with their own rig, and leave with their own. And riding a bunch of other people's bikes is one of the coolest party tricks in the world. We love seeing it, and we love giving it away." Cushing's Harley Coveralls in The RIDE 4's Bonus Pack is said to be a simple, versatile cover all which is great for warm summer days and cold winter nights, while offering the best of both worlds for those on the road. "For a cold weather rider, there's a lot to appreciate about a good coverall. The fact that they can be used in summer to protect your package from heat and wind is fantastic, and the long-style pockets add comfort by allowing you to store clothing and odds and ends neatly away from your body. But when winter arrives, the importance of being warm and dry is paramount, and a winter coverall doesn't just keep your 'pants' warm, it also blocks the cold and helps you shed heat and stay comfortable." P&SA's Buffer Coat in The RIDE 4's Bonus Pack is said to be a simple layer to use between thermal under or tops and a windproof jacket. Utilizing a revolutionary Thermolite insulation, this unique fiber is said to absorb heat rapidly then radiate that heat rapidly back into the atmosphere, reducing the amount of heat absorbed by your body and

Features: 8 main game levels 7 smaller levels 3 bonus levels Lots of enemies to fight Lots of traps Beautiful new graphics Original RPG game mechanics Not many annoying things that are so common in other games Screenshots Most recent reviews from: Play.com 4.2 16 May 2019 I bought this game thinking I was going to play it, and have ever since, it is nice to know I will continue to have something to do. So it has taken some time, but as I was playing it and came across an evil opponent that i thought I could kill, a warning screen came up. The world we see in the game and all the graphics are very nice, but what I liked best was the fact there was no loading or anything. Just turn on the game, and go! The loading had both positive and negative points, as the game could be very low in graphics or not at all, but on the other hand it would load up a huge game to begin with. But the danger is not that the game is low, but that is you are not ready for the game and drop it, as you are usually not prepared for the game until you reach the second half of the first level. On the positive side if you drop the game as soon as you are not prepared, you will get all your money back, on the negative side you will not be able to do anything with it, so you could
