## LottoWin

Uses a set of data to detect trends in past lottery results. Generates a large number of random combinations and then uses statistics to compare the results. When there are enough patterns then a trend is detected and the program will generate a future forecast on the next lotto draw. This application will generate and compare thousands of numbers during a run. It can run on a networked computer with a power of 1.7GHz, 512 or 1GB RAM. Features: Can run and analyze up to 100 random number draws. Works well on MSC SQL Server, MS Access, Oracle or MySQL databases Can generate up to 250 combinations per day. Comparative Analysis of 2, 10, 20 and 30 random number draws. Reports and graph statistical values from past draws. Attendance 2013/06/21 4.98 5 161 Super Lotto 6 Numbers FREQUENTLY ASKED QUESTIONS for Super Lotto 6 Numbers Introduction This program utilizes a super number algorithm, from the 5-6-7 method, to program the draws for Australian Lotto. How long can the program run? The application can run 12 different sets of 6 numbers in a random sequence. Each set of 6 numbers can be randomized between Tuesday and Saturday. The program can run for up to 8 hours continuously for the current draw. What is the best way to save this program for future draws? When the program is closed the draw for the current week will be saved for future runs. A new program will be opened to run the next draw. What is the point of the #9 answer? The #9 answer needs to be checked for any incorrect draws. Can the program be used for Powerball, Ozlotto and SuperLotto 7 numbers draws? Yes, it is capable of running all three. Why won't it run for the current week? Please note, that the draws for the current week will be given on Tuesday. Can I run this program while connected to the internet? Yes. Why has the numbers that are drawn changed? The numbers that are drawn do change and the majority of them change in a random sequence. How do I add Australia to the source? The country codes are provided in the source code of the lotto handler. Why can I only run for two days? This is the default setting which may be changed in options. What is the

It took us a while to find someone on the staff at LottoWin who could answer our question about Australia lottos. We were told that any lottery in Australia must have at least 7 wins before their win amounts can be paid. The minimum must be achieved in one week's time. It's obviously not possible to pay out winnings until the lotto winner is determined. Since we were interested in the LottoWin lottos we emailed and called them. They couldn't answer our question. We went on their website and found lots of info. They say they pay money out to winnings within 7 days. They offer 14 different games and games are advertised on their website. Their e-mail info is [lotto@lottowin.com.au](mailto:lotto@lottowin.com.au). Their call number is (03) 8764 4900. A customer service agent at LottoWin couldn't answer our question about Australia lottos. We found a few states in the United States where we could win with the right numbers combination. Information about 3 of these states is available on our lottos page. On that same lottos page we list lotteries for over a dozen countries from Austria to Zambia. You can choose your favorite lotteries by clicking on the ones you want to learn about. Select the country you want to learn
