Altruism, reciprocity, and cooperation in humans and other animals. Even when we consider the most selfish individuals that we know, we are amazed by their willingness to engage in risky, tedious, and self-imposed hardship in order to bring benefits to others. Altruism, charity, and cooperation sometimes require prodigious amounts of self-control, and parents, caregivers, and teachers (among others) are frequently obliged to watch over their young or over others with a modicum of selflessness and do not always have the resources, opportunity, time, self-restraint, or rationally based self-interest to follow

Jedrick was the first prisoner of war in the US Civil War. During the war, Jedrick and his unit were captured by Union soldiers and sent to be imprisoned at Point Lookout. Enduring two years as one of their own, Jedrick was constantly questioned about what was happening around him. Told that his country was being divided, Jedrick's mental state was shattered. After the Civil War, Jedrick returned to Baltimore and got a job working in a steamship yard. One day while repairing a broken boiler, his thoughts seemed to leave him and enter the boiler. After a quizlish accident Jedrick was taken to a hospital. A doctor there said Jedrick had gone mad from being around the steam. The doctor took Jedrick to Western State Psychiatric Institute in Maryland. Jedrick spent 2 years there. When he was released, Jedrick was told he was lost in his own mind. He couldn't remember anything about the war and he knew nothing about the world. Now, Jedrick has no wife, no home and nothing except the memories of the war. Jedrick may have escaped his mental prison for a short time, but now it is back and this time even worse. He gets up from his bed and begins to walk out of the room. "Ah. He remembered the world. He looked at the clock. It was 6:30 am, now. Jedrick's fists tightened. "One more day of this hell!" *---*---*---*---*---*---*---*---*---*---* Jedrick strode into his cell knowing he'd be jumping the gun to get his belongings. He looked at his clock, having already checked his razors and toothbrush were already taken by the guard who would return the items at the end of the day. The walls of his cell were covered in pictures of his fellow prisoners. He could picture each one of them. What happened to them? Why were they all found insane after being locked up in these insane institutions for no reason? Jedrick took a deep breath. His hand touched the painting of the victim of the Civil War that he had constructed. He took a step forward and fell to his knees. The painting of the victim was gently placed on a shelf and a guard walked in. " c9d1549cdd

What's new:

, who revolutionized first person shooters and is regarded as the greatest writer of post-apocalyptic novels and stories, has long been one of PC Gamer's favourite indie devs. Lately we've seen him branching out with the brilliant and demented adventure game Hansel and Gretel (so, so good) and the music-aided Binary Domain (worse than just about everything you've ever played). And coming out of his studio Rare, a name synonymous with classic Nintendo titles thanks to its 1990s heyday, he's also created Kinect Sports and Kinect Sports: Season Two. Whatever your feelings on Microsoft's motion-controlled game, the Move control system certainly got the job done and that job was to drill a rivet off our review unit, so that's a plus. "You are Tim Walker, the last American biker. Well, the only one. As a mercenary, hired to get to the bottom of this conspiracy and maybe save mankind from collapse, you'll have to be way cooler than those guys who just ride around Manhattan in rickshaws, collecting bags full of cash." I'm looking at what is probably one of Xbox Live's most watched trailers ever. Making pretty good use of the medium, WAKE's video shows an attractive blonde dodging a helicopter, her face lit brightly in the fiery sunset, the soundtrack a modified version of the opening bars of Easy-come-easy-go. Like a raving rave, it's been a celebrated effort for the XBL Avatar Marketplace. The video file has over a million plays. It's the sort of number that should ring alarm bells but the Waiting for a new Halo trailer's still got that all-time low for the traffic-junkie front page on Microsoft's flagship portal. The funny thing though is that, as an interesting experiment, it's not a bad idea. That's no lie. I'm not one who like to criticize other developers' efforts or say "you should have done X, Y, and Z", and that's fine, it's one of my most precious characteristics. I just want to talk about how great I think a game is, and if it's helping all of us, in this case Microsoft, to better understand Kinect and its potential uses, than I'm happy. So, yes, the video's pretty damn good. But in a world full of Kinect games, the less about flashy trailers and the more about gameplay, the better. So check this out:
