*Fantasy Setting:* Elements of fantasy (the ability to slaughter dragons and high-class equipment) were artistically and technically woven into the background scenes.

*1st Person Character Direction:* It is a unique style that lacks a fixed point of view.

*Striking Artwork and Beautiful Scene:* To create the feeling of high fantasy. From flowers to ancient ruins to tigers, dragons, and orcas. With a striking aesthetic.

*Story of the Characters: Greed, Destruction, the Fallen This World.* Through the machinations of different incidents made by them, there is a story of a world that ends itself. Their fateful emotions, their conflicts, and their individual struggles with unknown circumstances ... are all placed one upon another.

*Variety: The Lands Between:* The Lands Between are a mythological place where the ultimate key is given, an unknown world in the back of our mind. I made this game to unlock the door to this world and reveal it to everyone.

1. Don't run or install this game. 2. Install using game's description, direct link or modify the file if it's more suitable. 3. Copy cracked content to your installed game directory. 4. Play the game. 5. Enjoy. 1)I've created this thread to post the bugs I've encountered during this game. I've also made a couple of videos to show the gameplay, as well as some of the issues I encountered while playing. 2) For anyone new to virtual reality, and those who still need to be convinced, this game is a must-play! The moment you step into the world and wield a sword in the hand, it's like nothing you've ever experienced before. Truly, VR gaming has nothing comparable to it! 3) The game is full of bugs, not only for me, but for the other players, as well. When you talk to people in this game, sometimes you can hear nothing or see nothing. Sometimes, you won't be able to even see the cursor on your screen...not to mention, you'll hear static sounds coming from nowhere (for me, this occurs while I'm fighting with a monster). You'll also encounter problems with your hands, as if they can't actually interact with anything. The list of bugs in this game is endless! (Those who say otherwise are completely wrong.) 4) This game requires special equipment called the VR Headset, which you can buy from the developers for \$99.99. Not to mention, you'll also need a Sony PSVR (Virtual Reality Headset), which you can buy for \$100.99. These are not cheap; so, if you can't or won't buy them, this game is not for you. But please don't make the mistake of thinking that because the game requires them, that they are necessary to play the game in VR. 5) If you want to contact the developers, they have a support email: [support@hanard.com](mailto:support@hanard.com). You can also message them on Facebook: 6) For more information on the game, they have a website: 7) Since we are in the early stages of VR gaming, please understand that this is a game with a lot of bugs. It's worth trying, though. 8) If you like the game, please help them with donations; and, if
